August 29, 1988

Mr. Donald P. Hearth Associate Vice President for Research University of Colorado Campus Box 70 Boulder, CO 80309

Dear Don:

Enclosed is a list of summary observations and recommendations, as you requested. They follow our discussions at the end of the Panel 7 meeting so I don't believe there are any surprises.

If you need any clarification, don't hesitate to call. See you at the SSAC meeting in September.

Best regards,

Donald A. Beattie

Enclosure

OBSERVATIONS

- 1. SE&I Office significantly understaffed considering Level II functions assigned this deficiency will have a major effect on entire Space Station Program
- 2. Support contractor may have difficulty attracting staff with required experience based on limited knowledge of contract terms.
- 3. Management appears to have placed too high a dependence on TMIS as management tool and may be deluding themselves on how effective it will be <a href="https://www.men.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/when.com/
- 4. Interfaces with International partners appear to need clarification, improved discipline, better documentation, etc.
- 5. Based on documentation we received, does not appear to be a uniform approach to SE&I by all the Centers.
- 6. Associate Contractor approach may work but is untested in NASA environment no good analogy exists in DOD or NASA to model.
- 7. Did not have an opportunity to discuss how software will evolve over 30 year lifetime of program needs look?

RECOMMENDATIONS

- 1. SSAC consider reviewing with senior NASA management staffing needs and plans.
- 2. Panel 7 reconvene in about one years time to review SE&I function, progress, etc.
